Solair

AIR PURIFIER

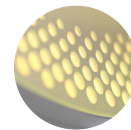

duux®

A unique piece of air cleaning art

The need for clean air

You're not usually aware of it, but the air we breathe is full of pollutants! Worse still, indoor air is up to five times more polluted than outdoors. And if you consider that we spent 90% of our time indoors ... an air purifier can hardly be called a luxury item!

Unique design

Solair's unique appearance allows it to be used as a showpiece in your living room. What's more, because it draws in air from all sides, it's more effective than a purifier that's hidden away in a corner!

Air and light

Solair takes care of two basic necessities: clean air and light. Besides an air purifying function, it also features multicolour ambient lighting. Set the colour and intensity of the light to your own personal taste.

99.97% air purification

The three filter layers purify the air up to 99.97% of particles and pollutants. And that means fresh air: pleasant to breathe and good for your health. The powerful motor can refresh 270m³ of air per hour.
